### COLLIER BAY

Arrival 9/7/2022

With a tidal range exceeding 14 metres, recorded near Yule entrance at the southern end of the bay, they are among the largest in the world. This massive daily movement of water creates **unique phenomena that occur nowhere else in the world**. Nestled in the centre of the Bay is **Montgomery Reef**, the world's largest inshore reef system. As the tide falls a raging torrent of water cascades off the top of the reef, creating **turbulent 'rivers' and mini waterfalls**. At the Southern end of the Bay, **Talbot Bay** is home to the world's only '**Horizontal Falls**' described by Sir David Attenborough as “One of the greatest

wonders of the natural world.” Hidden in the many caves and grottos of this ancient landscape are a multitude of ancient **Rock Art galleries**. Here you can find spectacular examples of the Wandjina and **Gwion Gwion** styles.
