- 9 Longyearbyen (NORWAY)
Disembarkation 07/04/2017 at 07h00

YOUR CRUISE

Discover Spitsbergen with a brand new Ponant itinerary. On this island, the sea spreads its thick, glittery coat of ice and time stretches out to eternity.

Step aboard the Le Boréal in Tromso for an 8-day expedition cruise.

Accompanied by a team of experienced naturalist guides, experience unique nature with jagged mountains, icebergs, enclosed - and sometimes dizzyingly high - valleys, massive glaciers and glacier toes.

Cruise by Bear Island, halfway between Norway's northernmost point and Spitsbergen's southernmost point. There, you can see the numerous seabirds who seek shelter on the island's vast southern cliffs: guillemots, Atlantic Puffins, fulmars, glaucous gulls and more.

Surrounded by the icy Arctic Ocean and nestling in between millennial glaciers and carved mountains, Spitsbergen in the summer is a place where the sun never sets.

FOCUS ON... WOODFJORD GLACIER OF MONACO

Located to the North-West of the Svalbard archipelago, the Monaco Glacier is probably one of Spitsbergen's most beautiful and majestic. Named in honour of Prince Albert I of Monaco, a sailor, it stands as an impenetrable, blue-tinged jagged wall, the last glacier before reaching a latitude of 80° North. Imagine the sound of the ice cracking as it breaks free and crashes into the translucent water. And to make the magical landscape even more perfect, you might be lucky enough to spot bears and whales, as these two animals have a special fondness for this area.
