YOUR CRUISE

[In partnership with LiRE.](#)

From Quebec, set sail aboard Le Soléal for the vast unspoiled expanses of the Far North.

Whales, dolphins and seals await you: Your first port of call will allow you to get as close as possible to many marine mammals, taking refuge in Saguenay Bay.

At the mouth of Saguenay River, you will reach Tadoussac. This National Park is also an unmissable site for whale watching as the mammals gather to feed before winter.

The Magdalen Islands offer an unusual variety of landscapes, from the white of the sandy beaches to the rouge of the sculpted cliff faces. You will be captivated not only by the natural setting but by the hospitality of the inhabitants.

You will conclude your journey with a visit to Boston. Nicknamed "America's Walking City" the city boasts a remarkable historical and cultural heritage.

FOCUS ON... PERCÉ

If you appreciate the beauty of scenery and geological phenomena, you will fall under the irresistible spell of Percé, one of the most beautiful villages in Quebec. Apart from the attractions of the town itself, Percé owes its reputation to its proximity to the famous rock of the same name that rises opposite it in the Gulf of Saint Lawrence. Along with the neighbouring Bonaventure Island, this rocky outcrop forms a national park famed for its natural, historical and geological heritage. With a choice of hiking, underwater exploration and cultural activities, you'll never be short of things to do in this fascinating region.
