YOUR CRUISE

Discover a new Ponant itinerary to the heart of Ultima Thule, a legendary stopover for those in love with the polar regions.

Step aboard the Le Soléal in Kangerlussuaq for a 17-day expedition cruise to the farthest reaches of the planet.

Between ice caps and ice floes, past glaciers, icebergs and brash ice, sail to the heart of the northern hemisphere's biggest ice producer.

You will stop over at Skraeling Island, the northernmost point reached by the Vikings, then return via the path taken by the famous American expedition led by Adolphus

From Greenland's west coast with its mountains softened by glaciers to the Arctic mountain range's steep slopes and Thule's high Arctic tundra, you will be sailing through the polar region's most spectacular landscapes.

Polar bears, musk ox and Arctic wolves: journey to see this amazingly rich fauna.

Subject to ice and weather conditions. The expedition highlights and itineraries described above illustrate possible experiences only and cannot be guaranteed.
