- 18 Vancouver (Canada)
Disembarkation 09/03/2019 at 07h00

YOUR CRUISE

With PONANT, discover Alaska's stunning landscapes and the incredible wildlife they contain. Board *Le Soléal* for a 13-day expedition cruise from Seward to Vancouver, for a journey to the heart of wild and unspoiled natural environments.

In Prince William Sound, in the Gulf of Alaska, surrender to the beauty of the icy décor all around you. During your Zodiac® outings, exploring the meanders of stunning fjords will lead you to impressive glacier fronts like that of the Hubbard Glacier.

A little further south, you will reach the tiny port of Elfin Cove. Its calm and glistening waters are an unrivalled peaceful haven that the local community of fishermen will invite you to discover.

During the first part of your cruise, *Le Soléal* will continue to clear a path through the Interior Passage and will draw closer to the temperate rainforest on Canada's west coast. This primary forest is a biodiversity hotspot where you will be able to observe numerous species such as bald eagles, black bears, grizzlies, sea otters, humpback whales and orcas. Here you'll find a concentration of life in an enchanting setting of mountains and conifers that is typical of these wild regions.

Subject to ice and weather conditions. The expedition highlights and itineraries described above illustrate possible experiences only and cannot be guaranteed.
