- 16 Reykjavik (Iceland)
Disembarkation 09/07/2021 at 07h00

YOUR CRUISE

Push the limits of sailing with this exceptional new 16-day expedition cruise to the **Geographic North Pole**.

To reach this mythical point covered by ice floe all year round, 700 km away from any emerged land, you will board *Le Commandant-Charcot*, the first hybrid electric polar exploration vessel.

Setting sail from Spitzbergen, you will enjoy an unforgettable maritime experience at the heart of sumptuous landscapes that are constantly evolving according to changes in the ice and the light. This itinerary, which lends itself perfectly to the observation of the **wildlife, particularly rich at this time of the year**, will take you as far as the **pack ice**. Then you will slowly progress to the heart of this silent world, frozen by the extreme cold, in the direction of the Grail of all polar explorers: the North Pole!

Beware though, as the ice floe is constantly drifting, driven together by currents and winds, you too must keep moving if you want to remain on our planet's most northernmost point...

We are privileged guests in these extreme lands where we are at the mercy of weather and ice conditions. The itinerary, landings on certain sites and the observation of certain wildlife cannot be guaranteed. They vary from day to day, making each PONANT cruise a unique experience. The Captain and the Expedition Leader will make every effort to ensure that your experience is as rich as possible, while complying with the safety rules and instructions imposed by the AECO.
